Bringing Claude-powered Agents to AI certification operations at TeqCertify

THE CLIENT

TeqCertify is an AI certification and career platform. It runs structured tracks in Generative AI, Data Science and Machine Learning that take learners from eligibility check through hands-on training to a recognized certification, with the goal of putting them in a job-ready position at the end of the program.

IN HER OWN WORDS

"As we scale across tracks and cohorts, our operations team can't grow linearly. GWC helped us bring Claude-powered agents into the core of how TeqCertify runs, so a small team can serve many learners well."

Charulatha, Head of Operations, TeqCertify

WHAT TEQCERTIFY NEEDED

- **A consistent learner experience:** every cohort supported to the same standard, whatever the track.
- **Operational leverage:** a small operations team serving many learners across programs.
- **Faster, fairer eligibility screening:** the right learner routed to the right track quickly.
- **Content that stays current:** a curriculum that keeps up with a fast-moving AI and data landscape.

THE AGENTS GWC BUILT

- **Eligibility and track matching:** guides applicants through screening and routes them to the right program based on background and goals.
- **Learner assistance:** answers questions on concepts, assignments, and career paths in a supportive, on-brand voice.
- **Cohort operations:** handles routine scheduling, reminders, and follow-ups so the ops team focuses on higher-value work.
- **Assessment and feedback:** supports evaluators with structured, consistent feedback on open-ended learner submissions.
- **Curriculum refresh:** scans the AI and data landscape and flags content that needs updating across tracks.
- **Human-in-the-loop oversight:** instructor and operations review is calibrated to the stakes of each interaction.

WHY CLAUDE AS THE FOUNDATION MODEL

- **Deep contextual reasoning** across curriculum, learner history, and career context.
- **Reliable, low-hallucination output** essential when the answer shapes a learner's next step.
- **Tool use and orchestration** across the LMS, scheduling, assessment, and communication systems.
- **Safety and governance** suited to a learner-facing platform with real career impact.

WHAT THIS UNLOCKS FOR TEQCERTIFY

- **Ops leverage** across cohorts without a linear increase in headcount.
- **A consistent learner experience** from eligibility check through certification.
- **Faster response times** on the questions learners ask most often.
- **A reviewable, repeatable process** that scales as new tracks are added.

WHY GWC

- **Claude AI partner** for advanced reasoning, document intelligence, and human-in-the-loop decision systems.
- **50+ prebuilt enterprise AI agents** across retail, finance, ops, and customer-facing workflows.
- **Innovation Lab:** a sprint-based build engine (Meaningful, Methodical, Measurable) that ships production-ready agents on a recurring cadence.
- **Full-stack ownership:** data → AI → insight → execution, one partner, one accountability.
