SOLUTION MATTERS

CLIENT USE CASE
Curriculum Associates

ACCELERATED BI MIGRATION · TABLEAU → POWER BI · BUILT WITH CLAUDE

Tableau to Power BI in 2 Weeks, Not 4 Months

Curriculum Associates needed to move its Tableau reporting estate to Power BI. Using the Claude licence the client already had, GWC Data.AI built a migration accelerator that automated the heavy lifting and moved 21 multi-page dashboards, over 40 report pages in total, in about two weeks.

RESULTS

2 weeks
Total migration time
Manual estimate: 3.5 to 4 months

21 dashboards
Migrated to Power BI
40+ report pages across sub-pages

~8x faster
Than the manual migration estimate
Using the client's existing Claude licence

THE CHALLENGE

- 21 Tableau dashboards with many sub-pages, covering 40+ report pages, all had to be rebuilt in Power BI.
- A manual rebuild of every calculation, visual and layout was estimated at 3.5 to 4 months.
- Rebuilding by hand risks numbers that no longer match the original reports, which erodes user trust.

OUR SOLUTION

- A **Claude-powered migration accelerator** that automates the Tableau-to-Power BI conversion.
- Built on the client's **existing Claude licence**, so no new AI tooling or spend was needed.
- Migrated reports are checked against the Tableau originals before handover.

HOW IT WORKS

01 Analyse Tableau
Read each workbook: data sources, calculations, visuals and page structure.

02 Translate Logic
Claude converts Tableau calculations and logic into Power BI equivalents.

03 Rebuild Reports
Visuals, layouts and sub-pages are recreated as Power BI reports.

04 Validate
Outputs are compared with the Tableau originals so the numbers match.

05 Review & Hand Over
The team reviews, finishes and delivers the migrated dashboards.

ACCELERATOR COMPONENTS

Workbook Analyser
Breaks each Tableau workbook down into data, logic, visuals and page layout.

Logic Translator
Claude-driven conversion of Tableau calculations into Power BI measures.

Report Builder
Recreates visuals, pages and navigation in Power BI.

Validation Checks
Compares migrated outputs with the source reports before sign-off.

BUSINESS IMPACT

Months Back
A 3.5 to 4 month programme delivered in about two weeks.

Consistent Output
Every dashboard is translated the same way, so there is less rework.

No New AI Spend
Built on the Claude licence Curriculum Associates already owned.

Repeatable
The accelerator can be reused for further BI migrations.
