# Bringing Claude-powered Agents to spiritual technology at OMG

## THE CLIENT

**OMG** is a spiritual technology platform where ancient wisdom meets modern tech. It brings pooja bookings, astrology and pandit consultations, verified temples, devotional content, and a devotee community together in one distraction-free experience for practitioners of Hindu and broader Indic spirituality.

## IN HIS OWN WORDS

*"Ancient wisdom deserves technology that treats it with care. GWC helped us bring Claude into the heart of OMG so that every recommendation, consultation, and piece of content reflects the tradition it comes from."*

**Mike Murali**, Chief Experience Officer, OMG

## WHAT OMG NEEDED

- **Cultural and ritual accuracy:** guidance that respects tradition, region, language, and lineage.
- **Personalized experience at scale:** every devotee served as if the platform knows their practice.
- **Safe, trustworthy interactions:** moderation and quality control on a deeply personal category.
- **Consistent quality across formats:** chat, voice, and video consultations held to the same standard.

## THE AGENTS GWC BUILT

- **Devotee guidance:** answers questions on rituals, festivals, and practices with sources rooted in tradition and language of choice.
- **Consultation matching:** routes devotees to the right pandit or astrologer by tradition, region, language, and specialty.
- **Booking and pooja orchestration:** assembles the right package, materials, timings, and follow-ups for each ritual.
- **Community safety and moderation:** keeps OMG Gram respectful and on-topic across a wide range of practices.
- **Devotional content assistance:** supports content curation and briefing across OMG TV and in-app surfaces.
- **Human-in-the-loop oversight:** scholarly and expert review is calibrated to the stakes of each interaction.

## WHY CLAUDE AS THE FOUNDATION MODEL

- **Deep contextual reasoning** across scripture, tradition, language, and ritual detail.
- **Reliable, low-hallucination output** in a category where a wrong answer can undermine trust instantly.
- **Tool use and orchestration** across bookings, consultations, content, and community systems.
- **Safety and governance** designed for a personal, culturally sensitive domain.

## WHAT THIS UNLOCKS FOR OMG

- **A more personal experience** for every devotee, across languages and traditions.
- **Faster onboarding** of verified temples, pandits, and devotional content.
- **Trustworthy interactions** in a category where trust is the product.
- **A reviewable, repeatable process** that scales without diluting the tradition it serves.

## WHY GWC

- **Claude AI partner** for advanced reasoning, document intelligence, and human-in-the-loop decision systems.
- **50+ prebuilt enterprise AI agents** across retail, finance, ops, and customer-facing workflows.
- **Innovation Lab:** a sprint-based build engine (Meaningful, Methodical, Measurable) that ships production-ready agents on a recurring cadence.
- **Full-stack ownership:** data → AI → insight → execution, one partner, one accountability.
